PROFESSIONAL SUMMARY

Data & business intelligence engineer, specialized in building end-to-end analytics platforms: data pipeline automation, data warehouse modeling, data visualization, and applied machine learning. In under a year, I delivered two full production-grade decision platforms, on my own, in demanding environments - banking (SIBTEL, +50M transactions/year) and telecom (Tunisie Telecom) - from business need to deployment. Available immediately, eligible for the Switzerland-Tunisia Young Professionals Agreement, fully mobile.

PROFESSIONAL EXPERIENCE

SIBTEL - Interbank Clearing Company of Tunisia — Dec. 2025 – June 2026
Automation & Data Engineer — *Tunis, Tunisia*

- *Sole interbank clearing operator in Tunisia, serving +25 member institutions.*
- Designed and deployed, on my own from start to finish, the first decision-support platform at SIBTEL (**+5 million transactions/month**).
- Built a single geographic reference for **2,200+ bank agencies** through **3 n8n workflows** merging 3 different sources (internal Oracle system, Central Bank API, national postal reference data), replacing a fully manual process and giving SIBTEL its first-ever geographic map of the network.
- Automated the daily collection, cleaning, and enrichment of data (duplicate/conflict resolution, geocoding), with zero manual work needed since going live.
- Orchestrated a daily **ELT** pipeline with **Apache Airflow** feeding a **star-schema** data warehouse, protected by **40** automated quality tests.
- Built **6 self-service Metabase dashboards** for the 28 member banks: *National Daily Overview*, *Bank Comparison*, *Agency Network*, *Payment Analytics*, *Bank & Agency 360°*, and *District & Regional* - cutting analysis time from several days to under 15 minutes.
- Deployed a full **monitoring** stack (Prometheus, Grafana, 3 exporters) covering the pipeline, warehouse, database, and server.
- Turned business needs from the Data Analytics, BI & Business Development unit into technical specifications, validated during weekly reviews with management.

Tunisie Telecom — June 2025 – Sept. 2025
Business Intelligence Engineer — *Tunis, Tunisia*

- *National telecom operator in Tunisia - assignment within the Regional Operation Center.*
- Designed and deployed, the first BI solution for the Regional Department, turning a fully reactive incident process spread across **52 monthly CSV files** (4 years of history) into one centralized, proactive view.
- Modeled (**Kimball** method, star schema: 1 fact table, 5 dimensions) and built a **PostgreSQL data warehouse**, fed by an **ETL pipeline in Talend Open Studio**.
- Built **3 Power BI dashboards**: *Incident Management*, *Problem / Root Cause Analysis*, and *Site & Service Performance* - the company's first-ever consolidated view of incident performance.
- Trained a **machine learning** model to predict incident resolution time, exposed through a **Flask API**.
- Built an **Angular** web app bringing the Power BI dashboards and the prediction model together in one portal.

SKILLS

Data Engineering	Apache Airflow (DAGs, scheduling), dbt (tests, incremental models), n8n, Talend Open Studio, SSIS
Data Warehousing	PostgreSQL, TimescaleDB, MySQL, Oracle, SQL Server, Star schema, Kimball
BI & Visualization	Power BI (DAX, Power Query), Metabase, Grafana + Prometheus, KPI reporting, data quality
Analytics & AI	Python (Pandas, scikit-learn), Machine Learning, Flask API, Angular, supervised/unsupervised learning
DevOps & Tools	Docker Compose, Git, Microsoft Power Apps, SAP Fiori, Tesseract OCR, Advanced Excel
Soft skills	autonomy on end-to-end projects, communication with business stakeholders, problem-solving, attention to detail.

EDUCATION

National Engineering Degree in Computer Science — 2023 – 2026
Private Higher School of Engineering and Technology (ESPRIT) - Tunisia
General average: 15.49/20 - Admitted with distinction

Bachelor's Degree in Computer Science — 2020 – 2023
Higher Institute of Multimedia Arts of Manouba (ISAMM) - University of Manouba - Tunisia
